

Marin County Schools COVID-19 Safety Plan

A Cal/OSHA Template for Marin K-12 Schools

2022-23 School Year

Guidance for Developing Your COVID-19 Safety Plan (CSP) formerly known as the SSSPP.

1. All Marin County K-12 Schools should follow the guidance in the **SMARTER Schools Plan**.
2. Maintain and update a Multi-disciplinary Task Force formed during prior school year (ie, teachers, custodians, school secretaries, para-educators, parents, students, and administrators) to develop and support this COVID-19 Safety Plan who will meet regularly, will seek and gather input from stakeholders, and will monitor Public Health Information to help adjust and implement the plan based on input from all stakeholders as needed.
3. Perform a school site walkthrough with the Task Force of your campus, classrooms, multi-use rooms, and office spaces and use the protocols, guidance and best practices detailed in the Marin County Schools Health and Safety Guidelines as a guide for conducting your assessment.
4. Develop and finalize your CSP and train staff before site-based classroom instruction begins.
5. Use the template below to create your own CSP by filling in the required details, based on your individual school site/school or district office, to mitigate the transmission of COVID-19, under the guidance of the Marin County Public Health Officer.
6. Finalize your CSP to distribute widely to staff and families, and post on your school website, encouraging input, suggestions and questions. You may also post a copy at your school or office at a visible location, at or near the main entrance where students, staff and visitors can easily review it without touching the document. CSPs should be updated if protocols shift under the direction of Public Health.
7. Post signs at each of the primary staff and student entrances to inform all students, staff and visitors that they should:
 - Not enter the facility with any COVID-like symptoms; stay home if sick
 - Wear face coverings when required; and
 - Practice good hand hygiene.

Tools for Developing Your COVID-19 Safety Plan (CSP)

1. COVID-19 Safety Plan Template

The Marin County Office of Education is providing this template, which incorporates the requirements of the Cal/OSHA Model COVID-19 Prevention Program (CPP), to be used by any school or district in Marin to create their own COVID-19 Safety Plan (CSP). This template has been reviewed and supported by Marin County's Public Health Officer, and must be posted on the School and/or District website.

2. School Specific Best Practices

The MCOE Rethinking Schools Task Force is monitoring updated guidance from the Center for Disease Control, the California Department of Public Health, the California Department of Education, and Marin County Public Health to support and promote emerging best practices to share with the school community in Marin. These best practices are based on alignment with local, state and federal guidelines in coordination with the county's Public Health Officer.

*** This COVID-19 Safety Plan has been developed with significant opportunity for public comment and input over the course of the 2022-23 School Year. Ongoing and additional public comment is welcome and encouraged for any future revisions by contacting a site administrator and/or one of the Public Health Liaisons identified on this document. Any comments, questions or concerns may also be forwarded to the Marin County Office of Education's Rethinking Schools Task Force at rapidresponse@marinschools.org.

CONTACT INFORMATION

School Name	Nicasio School
--------------------	----------------

I certify that I take authority and responsibility for all information in this document and attest to that the above school adheres to all elements required in the following CCR (California Code of Regulations), Title 8 sections:

- All of the elements that may be required in the following CCR, Title 8 sections:
 - 3205, COVID-19 Prevention
 - 3205.1, Multiple COVID-19 Infection and COVID-19 Outbreaks
 - 3205.2, Major COVID-19 Outbreaks
 - 3205.3, Prevention in Employer-Provided Housing
 - 3205.4, COVID-19 Prevention in Employer-Provided Transportation
 - The four Additional Considerations provided at the end of the CPP Template.

Additional guidance and resources are available at www.dir.ca.gov/dosh/coronavirus/.

SPECIFIC CONTROL MEASURES

All measures in **black text** are required by Cal/OSHA for any workplace. Please enter brief descriptions in the blank space under all **red text**. While K-12 schools have other specific requirements, they also remain workplaces for Teachers and Staff making the CPP required.

Identification and Evaluation of COVID-19 Hazards

We implement the following in our workplace:

- Conduct workplace-specific evaluations.
- Document the vaccination status of our employees which is maintained as a confidential medical record.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Develop and implement COVID-19 policies and procedures to respond effectively and immediately to individuals at the workplace who are a COVID-19 case to prevent or reduce the risk of transmission in the workplace.

Nicasio School works closely with Marin County Public Health to follow policies and procedures to respond immediately to COVID-19 cases

Review applicable orders and general and industry-specific guidance from the State of California, Cal/OSHA, and the local health department related to COVID-19 hazards and prevention including:

- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls, including maximizing the effectiveness of ventilation and air filtration.
- Conduct periodic inspections as needed to identify and evaluate unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.

Employee participation

Employees and their authorized employees' representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by:

Nicasio School employees regularly review this plan and identify/evaluate COVID-19 hazards.

Employee screening

We screen our employees and respond to those with COVID-19 symptoms by:

Nicasio School employees self-screen according to CDPH and Marin County Public Health guidelines.

Correction of COVID-19 Hazards

Unsafe or unhealthy work conditions, practices or procedures are documented, and corrected in a timely manner based on the severity of the hazards, as follows:

Identified unsafe or unhealthy work conditions, practices or procedures will be reported to Main Office staff and addressed/corrected in a timely manner. Corrective actions will begin within 1-2 business days.

Control of COVID-19 Hazards

Face Coverings

We provide clean, undamaged face coverings and ensure they are properly worn by employees when required by orders from Marin County Public Health or California Department of Public Health (CDPH).

- Face coverings will also be provided to any employee that requests one, regardless of their vaccination status.

Nicasio School provides face coverings for employees upon request (disposable surgical masks, KN95 masks).

Engineering controls

For indoor locations, we identify and evaluate how to maximize, to the extent feasible, ventilation with outdoor air using the highest filtration efficiency compatible with our existing ventilation system, and whether the use of portable or mounted High Efficiency Particulate Air (HEPA) filtration units, or other air cleaning systems, would reduce the risk of transmission. Taking air quality and portable air filtration systems:

The use of outdoor space for instructional purposes is maximized, shared, and coordinated. Nicasio School assesses indoor air quality and implements strategies that increase the amount of outdoor air brought into buildings. Current HVAC systems are optimized and supplemented with portable air cleaners when practicable. Windows and other sources of natural ventilation are open to the greatest extent possible.

Hand sanitizing

To implement effective hand sanitizing procedures, we:

Students and staff maintain a schedule for hand washing throughout the school day, including before and after eating. Hand sanitizer is provided in all classrooms and common areas, including staff rooms, library, lunch area.

Personal protective equipment (PPE) used to control employees' exposure to COVID-19

We evaluate the need for PPE (such as gloves, masks and hand sanitizer) as required and provide items as needed. Upon request, we provide respirators, which remain the best form of face covering protection, for use to all employees.

PPE is provided by Nicasio School as required and upon request by students and staff.

Testing of employees

We make COVID-19 testing available at no cost, during paid time, to all employees:

- Who have had close contact in the workplace; or
- Who have COVID-19 symptoms, and
- During outbreaks and major outbreaks (as recommended by Public Health.

Investigating and Responding to COVID-19 Cases

We have developed effective procedures to investigate COVID-19 cases that include seeking information from our employees regarding COVID-19 cases, close contacts, test results, and onset of symptoms. This is accomplished by following specific guidance and reporting protocols from Marin County Public Health and the California Department of Public Health.

System for Communicating

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- Who employees should report COVID-19 symptoms, possible close contacts and hazards to, and how.

- That employees can report symptoms, possible close contacts and hazards without fear of reprisal.
- How employees with medical or other conditions that put them at increased risk of severe COVID-19 illness can request accommodations.

Employees report COVID-19 symptoms to Main Office staff at onset. Office Staff are trained as Public Health Liaisons and follow Cal/OSHA and Marin County Public Health protocols.

- Access to COVID-19 testing:
Public health liaison staff collaborates with Marin County Office of Education and CA Department of Public Health to provide at-home and site-based rapid antigen test kits.

Training and Instruction

We provide effective employee training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards, and how to participate in the identification and evaluation of COVID-19 hazards.
- Information regarding COVID-19-related leave benefits to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that COVID-19 is an infectious disease that can be spread through the air.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing, face coverings, increased ventilation indoors, and respiratory protection decrease the spread of COVID-19 and are most effective when used in combination.
- The right of employees to request a respirator for voluntary use, as required by section 3205, without fear of retaliation, and our policies for providing the respirators. Employees voluntarily using respirators will be provided with effective training and instruction according to section 5144(c)(2) requirements, including:
 - How to properly wear them; and
 - How to perform a seal check according to the manufacturer's instructions each time a respirator is worn, and the fact that facial hair can interfere with a seal.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility.
- Proper use of face coverings. Since COVID-19 is an airborne disease, N95s and more protective respirators protect the users from airborne disease.
- The conditions where face coverings must be worn at the workplace (if any).
- That employees can request face coverings and can wear them at work regardless of vaccination status and without fear of retaliation.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.
- Information on our COVID-19 policies and how to access COVID-19 testing and vaccination, and the fact that vaccination is effective at preventing COVID-19, protecting against both transmission and serious illness or death.

Exclusion of COVID-19 Cases and Employees who had a Close Contact

Where we have a COVID-19 case or close contact in our workplace, we limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until the return-to-work requirements are met.
- Reviewing current CDPH guidance for persons who had close contacts, including any guidance regarding quarantine or other measures to reduce transmission.
- Developing, implementing, and maintaining effective policies to prevent transmission of COVID-19 by persons who had close contacts.
- For employees excluded from work, continuing, and maintaining employees' earnings, wages, seniority, and all other employees' rights and benefits.
- Providing employees at the time of exclusion with information on available benefits. This will be accomplished by:

Employees who are excluded from the workplace following California Public Health and Marin County Public Health isolation and quarantine guidelines are provided information upon request to the Main Office regarding available benefits at the time of exclusion.

Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases and outbreaks at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
 - Maintain records of the steps taken to implement our written COVID-19 Prevention Program. (This Document)
 - Make our written COVID-19 Prevention Program available on the website for employees, authorized employee representatives, representatives of Cal/OSHA and the Community immediately upon request.
 - Use the documents provided by Marin Public Health or a similarly created document to keep a record of and track all COVID-19 cases.
-

Return-to-Work Criteria

We will meet the following return to work criteria for COVID-19 cases and employees excluded from work:

- **COVID-19 cases, regardless of vaccination status or previous infection and who do not develop symptoms or symptoms are resolving**, cannot return to work until we can demonstrate that all of the following criteria have been met:
 - At least five days have passed from the date that COVID-19 symptoms began or, if the person does not develop COVID-19 symptoms, from the date of first positive COVID-19 test;
 - At least 24 hours have passed since a fever of 100.4 degrees Fahrenheit or higher has resolved without the use of fever reducing medications; and
 - A negative COVID-19 test from a specimen collected on the fifth day or later is obtained; or, if unable to test or the employer chooses not to require a test, 10 days have passed from the date that COVID-19 symptoms began or, if the person does not develop COVID-19 symptoms, from the date of first positive COVID-19 test.
- **COVID-19 cases, regardless of vaccination status or previous infection, whose COVID19 symptoms are not resolving**, may not return to work until:
 - At least 24 hours have passed since a fever of 100.4 degrees Fahrenheit or higher has resolved without the use of fever-reducing medication; and
 - 10 days have passed from when the symptoms began.
- COVID-19 tests may be self-administered and self-read only if the following independent verification of the results can be provided

Verification is provided by time-stamped photographs provided to Office Staff and uploaded into the Nicasio School Primary Health system.

- Regardless of vaccination status, previous infection, or lack of COVID-19 symptoms, a COVID-19 case shall wear a face covering in the workplace until 10 days have passed since the date that COVID-19 symptoms began or, if the person did not have COVID-19 symptoms, from the date of their first positive COVID-19 test.
- The return to work requirements for COVID-19 cases who do or do not develop symptoms apply regardless of whether an employee has previously been excluded or other precautions were taken in response to an employee's close contact or membership in an exposed group.
- If an order to isolate, quarantine, or exclude an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted.

END OF PROTECTION PLAN DOCUMENT

Marin County SMARTER Schools Plan

Supporting Safe In-Person Learning | 2022–2023 School Year

Dr. Matt Willis, Marin County Public Health Officer
Dr. Lisa Santora, Marin County Deputy Public Health Officer
Mary Jane Burke, Marin County Superintendent of Schools
John Carroll, Superintendent-elect of Schools

Updated August 15, 2022

The purpose of this document is to support Marin County educational institutions, including public, private, independent, and parochial TK-12 schools, to create safe and supportive environments where students thrive.

- **Shots** – Vaccines are safe and effective tools to prevent infection, long COVID, severe disease, and hospitalizations.
 - All eligible students and staff should get vaccinated, boosted (if eligible), and stay up to date with any newly recommended (including COVID and flu vaccines) or required vaccinations.
 - Any substitutes, contractors, visitors or volunteers working directly with students should be vaccinated, boosted (if eligible) and stay up to date.
- **Masks** – Masks are a simple and effective tool to prevent in-school transmission of COVID-19 and other respiratory illnesses.
 - Wear the most protective mask that fits well and will be worn consistently. KN95s offer enhanced protection; NIOSH-approved respirators (including N95s) offer the highest level of protection.
 - Marin County Public Health:
 - **Recommends** wearing a mask at schools indoors when community transmission is **high**.
 - Advises persons to **consider** wearing a mask at schools indoors when community transmission is **substantial / moderate**, especially if they or someone in their household is immunocompromised, high risk for severe illness or not fully vaccinated / up to date.
 - Advises persons to wear a mask based on their **personal preference**, informed by their personal level of risk when community transmission is **low**.
- **Awareness** – Stay informed, understand your risks and implement public health recommended strategies to reduce your risk.
 - Stay informed of community transmission rates in Marin County.
 - Marin County Public Health protocols should be followed for individuals who test positive and their contacts (link: Isolation and Quarantine Guidance)
 - Large gatherings (school assemblies) are allowed indoors and outdoors.
 - Take a same-day antigen test prior to attending a gathering or large event. If you test positive, stay home and isolate.

- Schools should optimize air conditioning systems and supplement with portable air cleaners when practicable. Keep windows and other sources of natural ventilation open to the greatest extent possible. In the event of poor air quality updated School Air Quality Recommendations should be followed.
- **Reporting –**
 - **Students and staff should stay home when they have signs or symptoms of any infectious illness and test for COVID-19.**
 - If they test negative, they can return to school when symptoms are resolving (at least 24 hours after their fever is gone).
 - If they test positive for COVID, they must stay at home for at least 5 days. Isolation can end after day 5 with a negative COVID test and symptoms are not present or are resolving.
 - Parents / guardians must report COVID-19 positive cases to their school, via the reporting method the school has identified. .
 - Schools must report outbreaks of COVID-19 and other reportable communicable diseases to Marin County Public Health.
- **Testing –** Testing keep students in school by helping detect infections before they spread.
 - All schools should ensure access to testing for staff and students, including response-based testing when in-school exposures occur. Testing of students must include appropriate parental permissions obtained in advance.
 - Staff and students should have a plan for rapid testing (i.e., having home tests or access to testing).
 - If any student or staff develops COVID-like symptoms or has close contact with someone who has COVID-19, testing is recommended.
- **Education –** We will keep schools open for in-person instruction, serve all students equitably and close the achievement gap. We will build relationships that ensure all students experience a sense of belonging and feel supported.
- **Readiness and Resilience –** The Marin school community needs to be ready to respond quickly and implement individual-, household-, and community- level protective behaviors and prevention strategies for all hazards, including poor air quality and disease outbreaks. Readiness means the following elements are in place:
 - All activities are consistent with and will adjust to changing applicable state and local Public Health orders and guidance.
 - Health and safety practices and protocols are in place, including hand washing, access to essential personal protective equipment (PPE), and testing. Training is provided to all staff, students and families reinforcing the importance of health and safety practices and protocols.
 - A primary and secondary point of contact are established, identified and trained at each school site to direct questions or concerns around practices, protocols, or potential exposure. These points of contact will serve as liaisons to Public Health, and contact information is identified in the COVID-19 Safety Plan.
 - A School Site-Specific Protection Plan (SSSPP) / COVID Safety Plan (CSP) outlining the above measures is completed, posted and updated on school or district websites and shared with all staff and families. Schools should update SSSPPs / CSPs as state and local Public Health guidance changes.

Plan de Escuelas SMARTER del Condado de Marin

Apoyando el aprendizaje seguro en persona | Año escolar 2022–2023

Dr. Matt Willis, Oficial de Salud Pública del Condado de Marin
Dr. Lisa Santora, Diputada de Salud Pública del Condado de Marin
Mary Jane Burke, Superintendente de Escuelas del Condado de Marin
John Carroll, Superintendente Electo de Escuelas del Condado de Marin

Emitida el 15 de agosto de 2022

El propósito de este documento es apoyar a las instituciones educativas del condado de Marin, incluyendo las escuelas públicas, privadas, independientes y parroquiales TK-12, para que se adapten a la evolución de la pandemia del COVID-19, y a la vez que crean entornos en los que los estudiantes florecen.

- **(Shots) Vacunas** – Las vacunas y los refuerzos son herramientas seguras y eficaces para prevenir infecciones, el COVID prolongado, enfermedades graves y hospitalizaciones. Todos los estudiantes y el personal elegibles deben vacunarse, reforzarse (si son elegibles) y estar al día con sus vacunas con cualquier vacuna recién recomendada (incluyendo vacunación contra el COVID-19 y la influenza) o requerida.
 - Todos los profesores sustitutos, contratistas, visitantes o voluntarios que trabajen directamente con los estudiantes deben ser vacunados, reforzados (si son elegibles) y estar al día con sus vacunas.
- **Mascarillas** – Las mascarillas son una capa de mitigación de seguridad simple y eficaz para prevenir la transmisión de infecciones en las escuelas por COVID-19 y otras enfermedades respiratorias.
 - Use la mascarilla más protectora que se ajuste bien y se usará de manera constante. Los KN95 ofrecen protección mejorada; Los respiradores aprobados por NIOSH (incluidos los N95) ofrecen el más alto nivel de protección.
 - Salud Pública del Condado de Marin:
 - **Recomienda** el uso de mascarilla en las escuelas en espacios cerrados cuando la transmisión en la comunidad es **alta**.
 - Aconseja que personas **consideren** el uso de mascarillas en las escuelas en espacios cerrados cuando la transmisión en la comunidad es **sustancial / moderada**, especialmente si ellos o alguien en su hogar tiene el sistema inmune debilitado, alto riesgo de enfermedad grave o no están completamente vacunados / al día.
 - Aconseja que personas usen una mascarilla según su **preferencia personal**, en función de su nivel de riesgo personal cuando la transmisión en la comunidad sea **baja**.
- **(Awareness) Concienciación** – Manténgase informado, comprenda sus riesgos (incluidas las enfermedades infecciosas y la mala calidad del aire) e implemente las estrategias recomendadas por la salud pública para reducir su riesgo.
 - Manténgase informado de los niveles de transmisión de la comunidad en el condado de Marin.

- Los protocolos de Salud Pública del Condado de Marin deben ser seguidos por las personas que resulten positivas y sus contactos. (enlace: [Guía de Aislamiento y Cuarentena](#)).
 - Se permiten grandes reuniones (asambleas escolares) en los espacios cerrados y al aire libre.
 - Haga una prueba de antígeno el mismo día antes de asistir a una reunión o evento grande. Si da positivo, quédese en casa y aíslese.
 - Las escuelas deben optimizar los sistemas actuales de calefacción, ventilación y aire acondicionado y complementarlos con purificadores de aire portátiles cuando sea posible. Mantenga las ventanas y otras fuentes de ventilación natural abiertas en la mayor medida posible. En el caso de baja calidad del aire, deben seguir las Recomendaciones Actualizadas sobre la Calidad del Aire en las Escuelas.
- **Reportando**
 - **Los estudiantes y el personal deben quedarse en casa cuando tengan señales o síntomas de cualquier enfermedad contagiosa y hacerse la prueba de COVID-19.**
 - Si la prueba resulta negativa, pueden volver a la escuela cuando los síntomas se resuelvan (al menos 24 horas después de que la fiebre haya desaparecido sin utilizar medicamentos para reducir la fiebre).
 - Si la prueba de COVID es positiva, deben quedarse en casa durante al menos 5 días. El aislamiento puede terminar después del día 5 con una prueba de COVID negativa y si no tiene síntomas o están mejorando.
 - Los padres o responsables deben informar los casos positivos de COVID-19 a su escuela, a través del método que su escuela haya identificado para que lo informen.
 - Las escuelas deben informar los brotes de COVID-19 u otras enfermedades transmisibles notificables al Departamento de Salud Pública del Condado de Marin.
- **(Testing) Pruebas** – Las pruebas previenen la transmisión del COVID y mantienen a los estudiantes en la escuela.
 - Todas las escuelas deben garantizar el acceso a las pruebas para el personal y los estudiantes, incluidas las pruebas basadas en la respuesta. Las pruebas realizadas por los estudiantes deben incluir la autorización de los padres obtenida con antelación.
 - El personal y los estudiantes deben tener un plan para realizar pruebas rápidas (es decir, tener pruebas en casa o acceso a las pruebas).
 - Si cualquier estudiante o personal desarrolla síntomas parecidos a los de COVID o está en contacto cercano con alguien que tiene COVID-19, se recomienda realizar la prueba.
- **Educación** – Mantendremos las escuelas abiertas para la enseñanza presencial, atenderemos a todos los estudiantes de forma equitativa y solucionaremos la brecha de logros. Crearemos relaciones que garanticen que todos los estudiantes tengan un sentido de pertenencia y apoyo.

- **(Readiness) Preparación y Resiliencia** – La comunidad escolar de Marin tiene que estar preparada para responder rápidamente y poner en práctica conductas de protección y estrategias de prevención a nivel individual, familiar y comunitario) que toma en cuenta todos los riesgos (incluyendo la mala calidad del aire y brotes). La preparación significa que los siguientes elementos están en su lugar:
 - Todas las actividades son consistentes con y se ajustarán a los cambios en las Órdenes y orientaciones de Salud Pública estatales y locales.
 - Están en vigor prácticas y protocolos de salud y seguridad, incluyendo el lavado de manos, el acceso a los equipos de protección personal (EPP) esenciales y las pruebas. Se proporciona formación a todo el personal, a los alumnos y a las familias para reforzar la importancia de las prácticas y protocolos de salud y seguridad.
 - Se han establecido, identificado y formado un punto de contacto principal y otro secundario en cada centro escolar para dirigir las preguntas o preocupaciones sobre las prácticas, los protocolos o la posible exposición. Estos puntos de contacto servirán de intermediarios con la Salud Pública, y se identifica la información de contacto en el Plan de Seguridad COVID-19.
 - Se ha completado, publicado y actualizado un Plan de Protección Escolar Específico (SSSPP) / Plan de Seguridad COVID (CSP) que describe las medidas antes mencionadas en los sitios web de la escuela o del distrito y se ha compartido con todo el personal y las familias. Las escuelas deben actualizar los SSSPP / CSP a medida que cambian las orientaciones estatales y locales de Salud Pública.
